Professional Experience

John Lyttle is the lead application and Share Point developer for Analytic Focus, LLC. He has more than twenty years of experience in full stack web application development in C# and VB supported by backend Oracle, Microsoft, and MySQL database as well as five years of extensive experience in MVC and Razor Page applications implementing Ajax programming and web services.

Mr. Lyttle also has experience working on application development teams for three Fortune 500 companies. He is very familiar with both client side and server-side validation and application design. Mr. Lyttle is knowledgeable in creating stored procedures, functions, and views with Microsoft SQL, My SQL, and Oracle databases. He also has fifteen plus years of project management and scrum process documentation with strong communication skills working with Business Users to implement solutions for their requirements.
