

ALEC JOHN LYTTLE

KEY QUALIFICATIONS

Over twenty years of experience in application development from concept to implementation. Seven years of extensive experience in Razor Pages, MVC, Ajax and Angular JS development. More than twenty years' experience with C# and Visual Basic development in Visual Studio since it began up to .Net 6.0. I have been programming for web site and application development include three Fortune 500 companies. I am very familiar with both client side and server side Visual Basic and Java scripting. Currently, writing in SASS/SCSS which complies to the .CSS files on build. Solid experience in creating stored procedures and views with Microsoft SQL, My SQL, and Oracle databases. Fifteen plus years of software project management and scrum process documentation with strong communication skills implementing key strengths that include:

- Project and team management, able to create strong organized goal oriented teams
- Analysis and requirements expert, experience with customer and technical contacts
- Senior web and application developer, capable of creating leading edge solutions
- Excellent troubleshooter, able to determine the root cause and resolution of issues
- Experience in cost and project scheduling, which meet the customer expectations
- Motivated team member, able to lead or be a strong contributing team player
- Secret Security Clearance and Security + Certification

A brief sampling of related engagements where Mr. Lyttle has been involved includes:

- Worked on web application with Azure database. The application was used to create conferences and meeting worldwide among members. Further the application distributed literature and videos about lectures and teachings.
 - Worked on multiple custom C# apps which include cash and credit card transactions.
 - Developer on multiple C# web applications with Razor Pages and MVC
 - Create Azure Durable functions, azure web applications and automated deployments
 - Created stored procedures, views and functions and batch processes in MS SQL server
 - Worked directly as interface with users from design to implementation of alterations.
- He worked on C# Electronic Cash Management application that implements ACH and Credit Card transactions from a multiple of interfaces through an AS400 connection to complete the transactions. ECM accepts input form web application, IVR (Voice Recognition phone software), and API's called from a variety of software including Money Gram.
 - Worked on multiple custom C# apps with Angular completing cash and credit card transactions.
 - Lead developer on the upgrading software application from C# application into Razor Pages and MVC application implementing Ajax and/or Angular and database versioning through TFS (Team Foundation Server)
 - Created new stored procedures, views, and functions in MS SQL server
 - SASS/SCSS developer to create the cascading style sheets on build
- Implemented a Run Once SQL Script that would run a pre or post deployment database

script once per environment specified in the SQL script variables. This allows a single database application to be published to multiple servers

- Worked on C# applications that run as Windows Services or as Windows Form application for multiple custom customer requirements; multiple web applications that access both MS SQL Server and Oracle databases and custom software that communicates with custom hardware.
 - Created multiple custom C# applications for importing customer data from CSV (Comma Separated Values) text files, MS Excel files and from customer external databases into our database. These applications also exported data to CSV files. Worked with teams to solve solutions for communicating between custom hardware and software.
 - Created new stored procedures, views and functions in MS SQL server to support new functions.
 - Worked directly as interface with users from design to implementation of alterations.
- C# and VB.net application with a MS SQL Server database. The opportunity involves adjustments to the applications as requirements evolve.
 - Created new stored procedures, views and functions in MS SQL server to support new functions.
 - Worked directly as interface with users from design to implementation of alterations.
 - Create custom application for development of NBA draft to assist coaches in timely player decisions.
- C# and VB.net web application with a MS SQL backend server.
 - Created custom solutions to meet and exceed customer's expectation for web application.
 - Created new stored procedures, views and functions in MS SQL server to support new functions.
 - Worked directly as interface with users from design to implementation of alterations.
- C# and VB.net web application with a MS SQL backend server. The companies required an experienced developer to work in an agile methodology to implement changes involved in acquiring new contracts for URS. The changes involved working as a team member on various portions of the applications including implementing a purchase ordering system, an equipment inspection, and e-mail process.
 - Implemented a purchase order system for tracking buyer's purchases within the web site.
 - Designed an equipment inspection section for the web site to capture and display government form
 - Created email methods for several processes to inform users after database updates
- The project is developed using C# executable application, two web sites, all accessing an Oracle backend database. The effort involves migrating PDF documents into a common location for ease of distribution to both the public and government personnel. My involvement with the project was from inception to production deployment. I was involved with multiple other projects using Share Point, C# and VB.net solutions with both MS SQL

and Oracle databases.

- Lead C# developer on the current project; and assisted on several other C# and VB.net projects.
- Developed the design documentation, the test cases and topology diagrams for the project.
- Worked on the company web site and worked on other internal projects for both companies.
- Created new stored procedures, views and functions in MS SQL server to support new functions

EDUCATION

USAF Honor Graduate, St Petersburg College, San Antonio Community College.

PROFESSIONAL EXPERIENCE

Systems Analyst/C# .Net Developer. BSF International - 2019-Dec - 2020 Mar

.Net Developer Systems Analyst/C# .Net Developer, SWBC - 2014-Jan - 2019 Nov

.Net Developer/Systems Analyst E.J. Ward, Inc., 2012-Oct - 2013-Dec

Contractor, San Antonio Spurs - 2010-Jan - 2019-Jun

Contractor, Dahill - 2012-Apr - 2012-Jul

Contractor, URS Corporation - 2012-Apr - 2012-Jul

Systems Analyst, VTS Vista Tech. Services & STS SpecPro Tech. Services 2009-Jun - 2012

FORTUNE 500 COMPANIES

USAA; United States Automobile Association

Dell Technologies

Bristol Myers Squibb

PROFESSIONAL LANGUAGES

C# & VB.Net, Razor Pages, MVC, Angular, ASPX, SQL, Oracle, VB Script, Java Script, Ajax, Bootstrap and JQuery
